

Technofast Products Applications: Power Stations

An EziTite Hydraulic Nut simply replaces a standard hex nut on any application.

Benefits of using Hydraulic Nuts:

- Reduced maintenance down-time
- Improves safety on the job
- Give reliable & precise tensioning
- Fast to fit & remove
- Requires little physical effort

Hydraulic Nut Options:

- Standard Range or Designed specifically to suit application.
- Various different coatings
- A high temperature range
- Commercial or high tensile grade

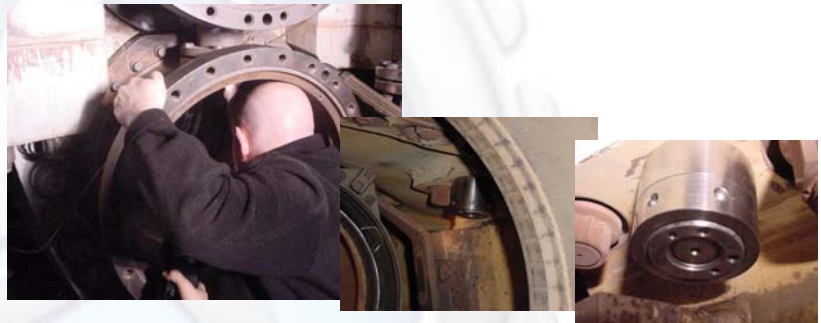

Recommended Product:

Ezitite® Hydraulic Nuts

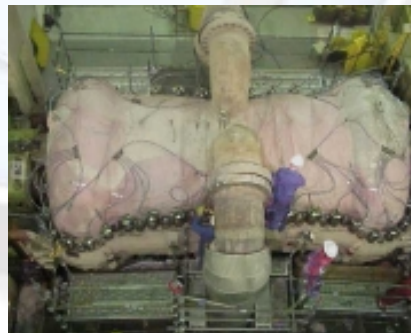

Gas Turbine Casing

Manway's

Steam Inlet Valves:

Special design Cone Nut & Matching Tensioner

Vertical Joint Bolting

Boiler Sling Rods

Other examples of applications for Hydraulic Nuts in Power Stations are:

- Feed Pumps
- Feed Heaters
- Circulation Pumps
- Couplings
- Sling Rods
- Hold down bolts
- Compressor disc couplings
- Steam valves
- Vertical & Horizontal Joint Bolting
