

Australian Technology Goes Worldwide

USA: Nuclear Power Plant

Technofast have signed an agreement with nuclear reactor giant Westinghouse Electric to supply HiTemp Hydraulic Nut systems for reactor covers. Technofast is the only company worldwide which has been approved for this application. Up to fifty eight 6" or 7" diameter bolts per cover are operated simultaneously to close the cover in under 2 hours, a process which normally takes 18 hours. The agreement comes at a time when the nuclear utilities are undergoing a programme of multi million dollar reactor cover replacements, increasing the need to improve safety, increase production and reduce

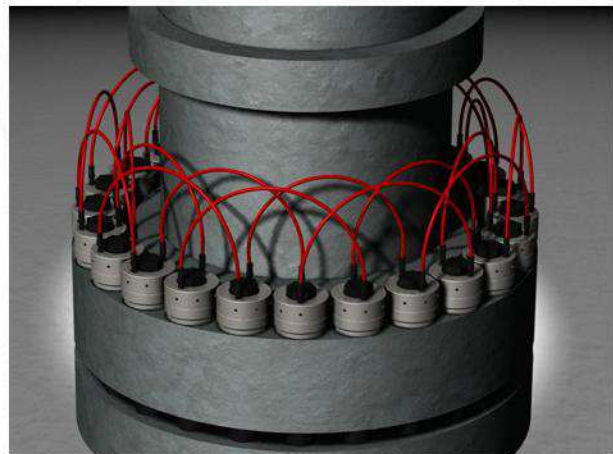

USA: Reactor Coolant Pumps

Technofast HiTemp Hydraulic systems are to be installed onto nuclear reactor coolant pumps, closing this critical joint in around 1 hour rather than the 1-2 days taken by present methods.

As with the reactor cover system outlined above, these will be supplied under the Nuclear Regulatory Commissions' stringent 10CFR50 safety related code, audited and approved by Westinghouse Electric.
